PROFESSIONAL SUMMARY

Flutter Mobile Engineer with 4+ years of experience designing, developing, and deploying cross-platform mobile applications for iOS and Android. Proven track record of delivering 20+ production apps across e-commerce, fintech, edtech, healthtech, and marketplace domains, serving clients worldwide through Khamsat and Mostaqi with consistent 5-star ratings. Skilled in Flutter, Dart, native Android (Java), state management (Bloc, Cubit, Riverpod), Firebase, RESTful APIs, and clean architecture. Graduated with Distinction in Software Development. Adept at translating business requirements into scalable, performant, and user-centric mobile solutions.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android (Java), iOS Deployment, Cross-Platform Development

State Management: Bloc/Cubit, GetX, Provider, Riverpod

Architecture & Patterns: Clean Architecture, MVVM, MVC, SOLID Principles, Repository Pattern

Backend & APIs: Firebase (Auth, Firestore, Storage, FCM, Crashlytics), RESTful APIs, GraphQL, Laravel, PHP

Databases: SQLite, Hive, Firestore, MySQL

Tools & DevOps: Git, GitHub, GitLab, Postman, Android Studio, VS Code, Xcode, CI/CD basics

Integrations: Stripe, Google Maps, Firebase Cloud Messaging, Google Fit, Apple Health, Social Auth

Other: UI/UX Implementation, Performance Optimization, App Store / Play Store Deployment, Localization (i18n)

PROFESSIONAL EXPERIENCE

Senior Flutter Engineer

Netloopers

Jun 2026 – Present

Gaza, Palestine

- Develop the official Netloopers mobile application using Flutter, translating the company's web-based freelancing platform into a cross-platform mobile experience for iOS and Android.
- Build scalable application foundations using Clean Architecture and modular development practices, while implementing responsive UI components and preparing features for backend API integration.
- Collaborate with the team to translate platform requirements and existing web experiences into maintainable, production-ready mobile features.

Mobile Application Developer

TAQAT

Jul 2024 – Present

Gaza, Palestine

- Develop production-grade Flutter applications for clients across the MENA region, delivering 10+ projects with on-time delivery rates above 95%.
- Architect scalable mobile solutions using Clean Architecture and Bloc/GetX patterns, reducing code maintenance time by an estimated 30%.
- Integrate third-party services including Firebase, REST APIs, payment gateways (Stripe), and push notifications to extend app functionality.
- Collaborate with designers and product owners to translate Figma mockups into pixel-perfect, responsive UIs supporting both iOS and Android.

Flutter Developer

Scriptech

Nov 2024 – Mar 2025

Remote

- Led end-to-end development of Haraj Aden, a classified ads marketplace mobile app supporting 3 user roles (Super Admin, Admin, User) with role-based access control.
- Implemented advanced features including paid ad-promotion plans, multi-criteria search filters, and in-app messaging, enabling smooth buyer-seller interactions.
- Optimized app performance and state management using GetX, achieving smooth scrolling on listings of 1,000+ items.
- Coordinated directly with stakeholders to gather requirements, present demos, and iterate based on feedback in 2-week sprint cycles.

Flutter Developer

Logiteca Solutions

Aug 2023 – Jan 2024

Gaza, Palestine

- Completed an intensive 2-month traineeship focused on production-level Flutter development, code reviews, and debugging methodologies.
- Contributed to the development of Sezon Store, a multi-vendor eCommerce app with Stripe payment integration and Firebase backend.
- Resolved complex bugs and performance issues in the Eureka investment app, improving load times and overall stability.

Freelance Mobile App Developer

Khamsat & Mostaq

2023 – Present

Remote

- Delivered 25+ Flutter and native Android projects for clients across Saudi Arabia, UAE, Egypt, and Yemen with a consistent 5-star rating.
- Maintain Top Rated profiles on both Khamsat and Mostaq platforms through reliable delivery, clean code standards, and clear client communication.
- Specialize in full-cycle delivery: requirements analysis, architecture, development, testing, store deployment, and post-launch support.
- Built expertise across diverse domains including e-commerce, fintech, edtech, healthtech, social, and marketplace applications.

SELECTED PROJECTS

Jood – Smart Service & Food Offers Platform | Flutter, *Firebase*, *REST API*, *Cross-Platform Deployment*

[Google Play](#) • [App Store](#)

Live, scalable mobile application connecting users with services and food offers through a modern interface, featuring dynamic data handling, intuitive user flows, and a flexible architecture designed for future expansion.

Rajeali – AI-Powered Lost & Found Platform | Flutter, *Firebase*, *AI Matching*, *Real-Time Chat*

Smart mobile application that helps users recover lost items by posting lost/found cases and leveraging AI-based matching to connect relevant users, with real-time chat enabling seamless communication between item owners and finders.

Aura Fit – AI-Powered Fitness App | Flutter, *Firebase*, *AI/ML*, *Google Fit*, *Apple Health*

Comprehensive fitness platform with AI-driven onboarding, personalized workout and meal plans, calorie detection via image recognition, and seamless health-data sync with Google Fit and Apple Health.

Sezon Store – Multi-Vendor eCommerce | Flutter, *GetX*, *Firebase*, *Stripe*

[GitHub](#)

Feature-rich multi-store eCommerce app with custom UI/UX, real-time inventory, secure Stripe payments, bank transfers, and reactive state management using GetX.

Naseeb – Islamic Matchmaking Platform | Flutter, *Firestore, Real-Time Messaging*
[Google Play](#)

Privacy-first matchmaking app with personalized profiles, compatibility filters, secure messaging, and a likes/matches system tailored to Islamic marriage values.

Aid For Palestine – Humanitarian Aid Platform | Flutter, *REST API, Real-Time Chat, Fundraising*

Mobile platform supporting humanitarian aid coordination and beneficiary management with user registration, profiles, in-app chat, and admin dashboards.

Haraj Aden – Classified Ads Marketplace | Flutter, *REST API, Role-Based Access Control*

End-to-end marketplace connecting buyers and sellers with paid ad promotion plans, advanced search filters, and a 3-tier role system (Super Admin / Admin / User).

Eisal – Digital Receipts & Invoice Management | Flutter, *REST API, ZATCA, Localization*

Business-focused mobile app for managing digital receipts, invoices, and warranties, with multilingual support, theme switching, and smart push notifications.

Yalla Call – Telecom Recharge & Digital Services | Flutter, *REST API, Payment Gateways*

Telecom recharge and digital-services app with scalable architecture supporting multiple service providers and payment integrations.

Split Pay – Group Expense Sharing | Flutter, *Firestore, Real-Time Sync*

Group payment app for splitting bills and tracking shared expenses, with real-time updates, automatic balance calculation, and complete transaction history.
